

Press release

**D-BOX Technologies is proud to contribute to this year's
Driving Simulation Conference in Stuttgart.**

Montreal (Québec), August 24, 2017. — D-BOX Technologies Inc. ("D-BOX") (TSX: DBO), a pioneer and innovative leader in cutting-edge motion-cueing systems is pleased to play a prominent role at this year's Driving Simulation Conference in Stuttgart, Germany on September 6th and 7th.

Their unparalleled motion-cueing technology will be featured in 3 different exhibits to give attendees a better sense of the innovative technology that has made D-BOX one of the most sought after systems in Simulation and Training. The first demo taps into the growing fascination with motorsport by utilizing the sim racing video game, Assetto Corsa to produce a unique interactive experience in one of the world's most beloved automobiles, Porsche. The second demo brings together SCAre software from OKTAL and a driving simulator from SiFat Road Safety to create a hyper-realistic simulation of a compact car in an urban environment. And the third demo delivers an action-packed, 4-minute VR ride around the ICAR racetrack in Mirabel, Quebec, Canada. Driven by former professional pilot, Bertrand Godin, the demo successfully recreates the incredible power of an actual racecar.

"This conference is an amazing opportunity for us to demonstrate the depth of our technology to key players in the automotive industry," says Yannick Gemme, Vice President, Entertainment Sales, Simulation & Training at D-BOX. "We're extremely proud of the level of realism our systems deliver and their ability to easily and efficiently integrate into a wide range of simulators. We can't wait to meet with attendees to discuss the advantages that our motion technology can bring."

The 2017 Driving Simulation Conference exhibits the latest in driving simulation technology, research and development bringing together academics, practitioners and representatives from the world's leading car manufacturers and suppliers.

To meet with a D-BOX representative, or to experience the technology, visit booth numbers 5.

About D-BOX

D-BOX is a company of visionaries, artists, and innovators. We create hyper-realistic, immersive entertainment experiences by moving the body and sparking the imagination through motion. This expertise is one of the reasons why we have collaborated with some of the best companies in the world to deliver new ways to tell great stories. Whether it's movies, video games, virtual reality applications, themed entertainment or professional simulation, we are driven by a desire to amplify the experience and, ultimately, move the world.

D-BOX Technologies Inc. is a publicly traded Canadian company listed on the Toronto Stock Exchange (TSX: DBO). D-BOX head office is located in Montreal and offices are based in Los Angeles, USA and Beijing, China.
